FARIES MANUFACTURING CO. - CATALOG 26

ILLUSTRATED CATALOG

NUMBER 26

Original, Artistic, Economical Fixture Trimmings
A Great Many of Which Are Patented and
Protected by Copyright

We Are
Designers, Modelers, Founders, Spinners, Turners and Makers
of Gas, Electric and Combination Brass Fittings
Spun and Stamped Brass Goods
Automatic Brass Turnings
Brass, Bronze and Aluminum Castings of All Kinds
and
Parts for Fixture Manufacturers and Dealers

Copyright, 1918, Faries Mfg. Co.

This catalog is protected by United States Copyright, owned by Faries Manufacturing Co. The copying of its subject matter is an infringement which will be vigorously prosecuted.

PROTECTION

We protect our customers in the use of our products and assure them of their superior quality, practical construction, artistic design, new metal, and in all ways satisfying the requirements of the user, and cheapest in the end. We are rapidly securing patents on all of our original articles and are protecting them against all copyists.

BUY FROM THE ORIGINATORS

DESIGN PATENTS

Our many Design Patents on Fixtures and Fittings include their particular ornamentation and detail both in general appearance and in special features, also their characteristics in outline and shape. Any similar designs that may be mistaken "by the casual observer" to be the same things, or that appeal to the artistic emotions as the same, come under the law as colorable imitations and unfair substitutes.

WE HAVE LICENSED NO PERSONS OR FIRMS TO MANUFACTURE ANY OF OUR DESIGNS OR ANYTHING SIMILAR TO THEM FOR THE PURPOSE OF SELLING TO THE TRADE.

We have many Design Patents now pending in Washington and are continuing to patent all of our original designs to protect them against unfair copyists.

WARNING

United States Patent Law provides a penalty of $250 for making, selling or OFFERING FOR SALE an infringing article, as well as court costs, damages shown, and an injunction covering same. Several cases have already been tried, injunctions handed down and penalties collected against the unlawful making of infringements.

BUY FROM THE PATENTEES

MECHANICAL PATENTS

Our Patents and Patent Pending on any Device are written to cover all important Mechanical features of that Device. In a mechanical patent the design and artistic features are not considered; the mechanical elements alone are involved. The claims of our inventions are such as to cover all practical forms for the specified uses. Therefore the change of design would not avoid infringement.

ANNOUNCEMENT

Please Read this Page Carefully. It Will Prevent Errors and Perhaps Misunderstandings

We take pleasure in presenting herewith a completely revised and up-to-date

CATALOG NUMBER 26

showing our original, artistic, economical Fixture Trimmings, Brass Fittings, Turnings, Stampings, Spinnings and Iron Fittings

The same high quality will be maintained in these goods that has kept the Faries Fittings recognized as standard since **1880.**

NEW GOODS—We are continually adding to the different classes of goods shown in this catalog, and if at any time you do not find what you want, **write us.** We possibly have the goods in stock, or would be willing to make them for you.

HOW TO ORDER—When ordering, please use catalog number and name of goods. Please do not use the words "same as last." State whether goods are to be shipped by freight or express. Unless preference is given, we will ship according to our best judgment.

PRICES—Prices are given in connection with each cut, and supersede all former prices or quotations on goods listed in this catalog. Discount will be quoted on application. Prices subject to change without notice.

TERMS—Net thirty days, or 2% for cash within ten days from date of invoice.

REFERENCE—Unless you know yourselves to be well reported by the commercial agencies, money should accompany order, or satisfactory references be furnished.

C. O. D.—We will send goods C. O. D., but as a guarantee of good faith the parties so ordering will be required to remit with order an amount suffcient to pay transportation charges both ways, which will be deducted from the bill.

FINISH—When ordering, state finish desired. If none is indicated, we will always ship Unfinished, unless otherwise specified, excepting on Pages 88, 122 and 123 which will always be shipped Brushed Brass unless otherwise ordered. We will finish the unfinished material listed at the percentage for finishing marked upon each page. This percentage is added to the list price, and is subject to our trade discount. These prices are for Brushed Brass finish. Nickel Plate, Gun Metal, Oxidized Copper or Statuary Bronze, 10% advance. On Roman Gold, White Enamel or Old Ivory, 20% advance. Antique Silver 25%. Special finishes on Chain, prices on application.

OUR RESPONSIBILITY—We use every care in packing our goods, and our responsibility ceases when we have obtained carrier's receipt for goods in good order.

PACKING AND CARTAGE—Our charge for boxing will always be reasonable, charging only enough to cover cost of material used in putting up the goods. **No charge made for cartage.**

CLAIMS FOR SHORTAGE OR DEDUCTIONS must be made within ten days from receipt of goods. Goods returned without our instruction will not be received.

SPECIAL ORDER WORK—Special order work not subject to cancellation.

CAST BOWL CLAMPS—Unfinished

SOFT BRASS TO BEND IF REQUIRED

DESIGN PATENTS

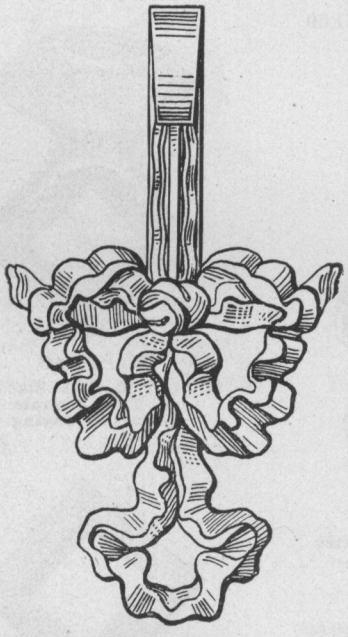
Our Design Patents on this clamp include its particular ornamentation and detail, both in general appearance and in special feature, also its characteristics in outline and shape.

Any similar design that may be mistaken "by the casual observer" to be the same thing, or that appeals to the artistic emotions as the same, comes under the law as a colorable imitation and unfair substitute.

MECHANICAL PATENT

Our Patent on this device will cover all important mechanical features of hangers for undrilled bowls. In a mechanical patent the design or artistic features are not considered, the mechanical elements alone are involved. The claims for this invention are so broad and strong as to cover all practical forms of hangers for undrilled bowls. Therefore, the change of design would not avoid infringing.

Offering clamps for sale that embody any of our patent claims is an infringement



No. 11244
Patented
Front View, Full Size

Ribbon Bow Clamp
For Undrilled Bowls with Flange
Upper Hook for Supporting Chain
Lower Ribbon Loop for Drop Light
Screw to Tighten on Glass
Eyelet Fits Shoulder Nipple
Per hundred **$30.00**

THE OUTER PENDANT ON A HEMISPHERE BOWL

When used on a hemisphere two links may be fitted in the upper hook, thus providing for an exterior pendant light as well as the supporting chain. The pendant in this use will hang beyond the edge of the glass bowl.

THE LOWER PENDANT ON A HEMISPHERE BOWL

The lower extension of the bow may be bent out to hold a pendant light just under the edge of the glass bowl.

THE OUTER PENDANT ON A SQUAT BOWL

When used on a squat shaped bowl the lower extension of the bow may be bent to hold the pendant light.

FOR WREATH DESIGN SQUAT BOWL

Glass with sharp curves may be fitted by bending the lower part of the bow to follow the shape.

THE TRIPOD BEARING

To insure a fixed position this clamp includes one of our original inventions—that of the three point bearing on the outer surface, and a single, adjustable, intermediate bearing on the inner surface of the glass bowl, preventing all movement when set tight.

Cast brass bowl hanger with spring clamp. Has new merits; it is new in its application and uses, and its appearance is all that could be desired. It will meet the approval and requirements of the better class of fixture trade.

An ornamental spring clamp hanger for undrilled lip bowls, that will put a candle arm in the proper position to the bowl, making a semi-indirect candle fixture. The hanger can also be used with loops to drop a light down on the outside of the bowl, or it can be used with special arms of your own design.

It can be used without an arm and is designed to give an ornamental appearance to your bowl when used only as a hanger. It is a gravity hanger, but is made doubly secure by the use of a small spring on the inside. There are no screws to set or adjustments to be made. The hanger is made and designed to fit the greatest number of lip bowls now on the market.

Improve the sale and appearance of your semi-indirect fixtures with hangers that are a credit and an improvement to them.

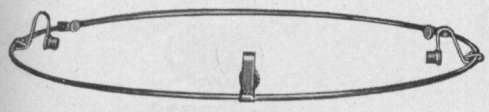
ADJUSTABLE BOWL RING

PATENTED



No. 7529

For 22 Inch Bowl and Smaller, With Four Fingers

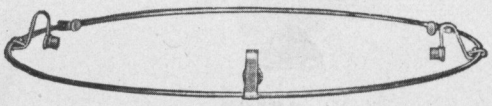
List Price—Nickel Plated.....**$ .80**

Made of rod with two turned fittings and two set screws, and is adjustable by screws.

Socket fingers may be set or spaced as desired.

No breakage from heat, expansion or contraction.

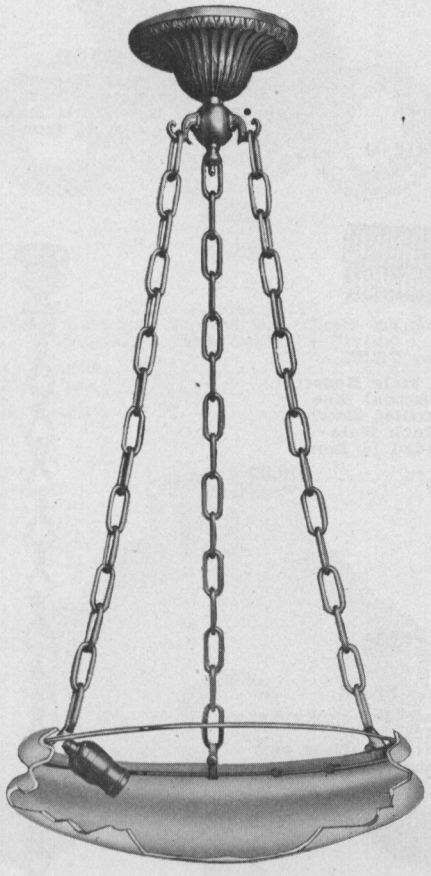
Made in two sizes to fit any bowl.



No. 7528

For 16 Inch Bowl and Smaller, With Three Fingers

List Price—Nickel Plated.....**$ .70**



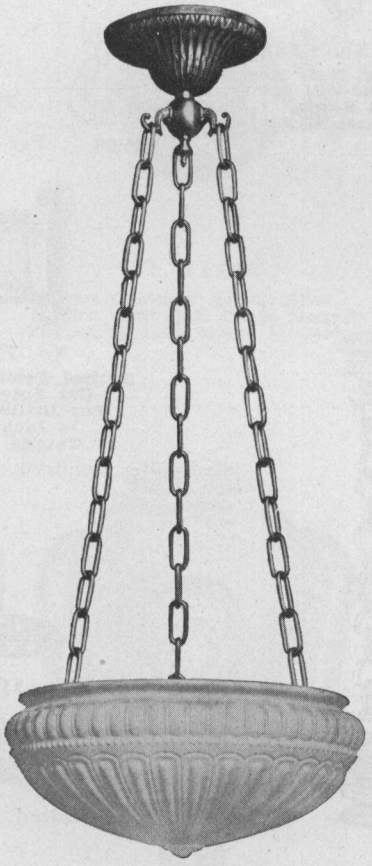


Illustration shows how this hanger fits a bowl and how the strain is entirely relieved from the edge of bowl.

Bowl can be removed from hanger for cleaning by an inexperienced person without disturbing wiring.

Neatest hanger in appearance on the market.

Simplest and quickest to install. Safe and efficient without shadows.

These cuts show the bowl ring in actual use.

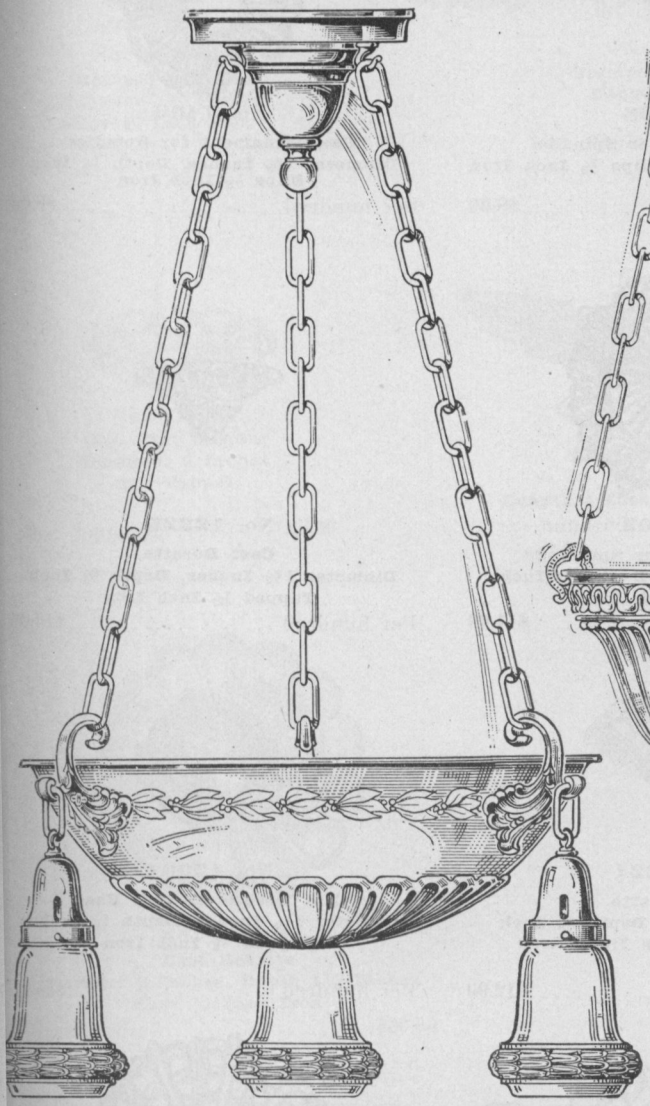
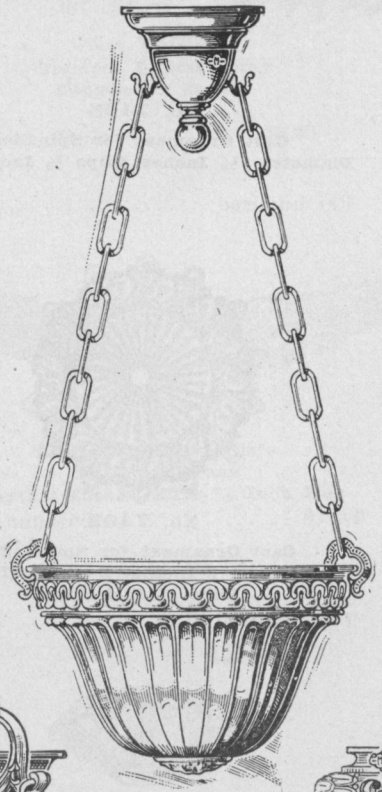
PATENTED CLAMPS AND HANGERS FOR LIGHT REFLECTING BOWLS

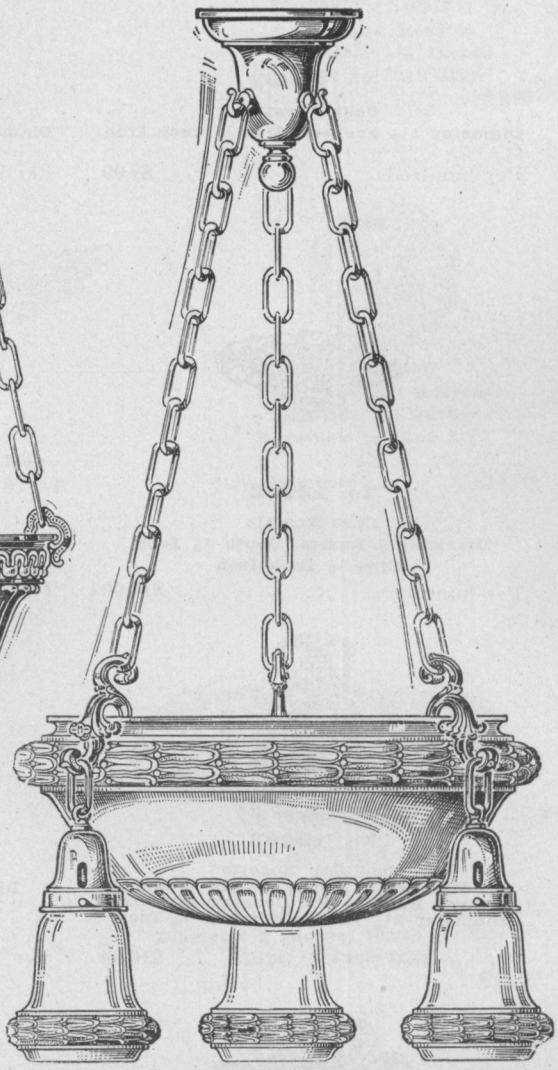
These illustrations show the use of three leading designs of clamps, patented and manufactured by us. We list nearly 60 designs, and are continually adding new shapes to meet the increasing demands.

We make new designs whenever the glass manufacturers produce shapes that we have not already provided for. If clamps are needed for new or odd shaped bowls, send the maker's name and catalog number or a full size sketch for our estimate or recommendation for installing same.





No. 11163



No. 11175 Clamp shown in above cut may be used with or without the extra pendant light as the outer hook serves as an ornament also.

This clamp fits, and is suitable in design for most bowls that are bored ½ inch or ⅜ inch holes.

No. 11173 is the same design when required to fit undrilled bowls.

Both of the above clamps are protected by United States Letters Patent.

For specifications and prices see Page 36.

No. 11163 Clamp shown in above cut fits all hemisphere, squat or fancy bowls with a flange or design on which it may be tightened, as it is provided with 3 bearing points on the exterior of the bowl, forming a tripod bearing, and a 1 inch set screw inside the bowl to secure it in a rigid position.

No. 11207 secures to the bowl in the same manner but is provided with an extended chain hook to hang the chain farther beyond the edge of the bowl.

No. 11133 is a little heavier but not so adaptable to all bowls.

All of the above clamps are protected by United States Letters Patent.

Nos. 11133 and **11207** is shown on Page 33.

No. 11163 is shown on Page 34.

No. 11158 Clamp shown in above cut may be used with or without the extra pendant light as the outer hook serves as an ornament also.

This clamp fits all hemisphere, squat or fancy bowls with a flange or design on which it may be tightened in a rigid position.

No. 11208 secures to the bowl in the same manner but is more ornamental and holds the extra pendant light much farther from the bowl.

Both the above clamps are protected by United States Letters Patent.

No. 11158 is shown on Page 32.

No. 11208 is shown on Page 39.

All clamps are provided with felt washers, jamb nuts and set screws wherever required; wire channel and inlet ready for socket nipple. When priced "unfinished" all machining is done.

Not less than one dozen of any patented article shipped at a time.

Other Fixture Parts shown in above Cuts are illustrated and specified throughout the Catalogue.

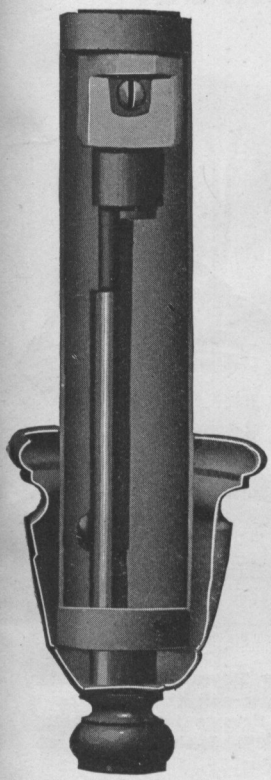
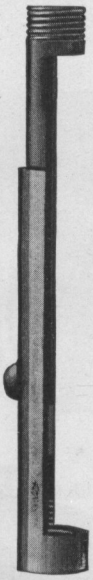
ADJUSTABLE CANDLE STEMS AND CANDLES

PATENTED



Showing Tube in Use on a Candelabra Socket



Made of heavy tubing, which makes it very rigid. Tubing is open to facilitate wiring. The adjustment is simple and quick and cannot slip when the screw is set.

Saves time and expense in wiring.

Nothing to break or wear.

Made in two sizes.

STEEL AND MALLEABLE SECURING BRIDGES

ADJUSTABLE STEEL CEILING LIGHT BRIDGES

When installing spun or stamped shells such as ceiling lights, single units, etc., over outlet boxes whether on steel or concrete surfaces, it becomes necessary to span the outlet box with a bridge secured either to the fixture stud in the box, or to lug screws on the edge of the box, and to this bridge attach the spinning by means of 8/32 screws at the extreme ends.

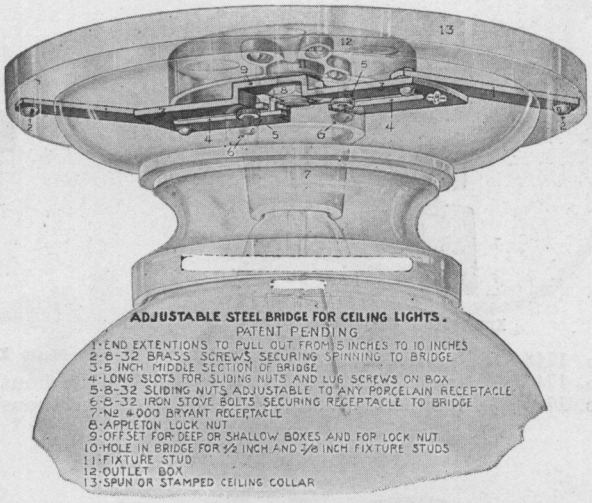
A porcelain receptacle secured to the bridge as shown in the illustration furnishes insulation for the entire fixture.

The bridge shown in the cut is made of $\frac{3}{32}$ inch pressed steel and will support any standard ceiling collar. The center offset may be turned either side up to fit deep or shallow boxes, and is punched to fit ⅜ iron studs and the Appleton hexagon nuts.

The two 8/32 round nuts will slide in the long slots and are to be adjusted to the diameter of any porcelain receptacle required. The long slots also permit the use of lug screws when the outlet box is without a fixture stud.

The two end extensions are tapped 8/32 at the extremities for securing screws through the edge of the ceiling light. These extensions may be stretched out or pushed together to fit the upper edge of spinnings anywhere from 5 inches to 10 inches top diameter.

The phantom drawing shows the bridge in use over a 4 inch iron outlet box with a ⅜ iron fixture stud, a No. 4000 Bryant porcelain receptacle secured to the sliding nuts and a spun ceiling light with 8 inch top diameter.



ADJUSTABLE STEEL BRIDGE FOR CEILING LIGHTS.
PATENT PENDING
1-END EXTENTIONS TO PULL OUT FROM 5 INCHES TO 10 INCHES
2-8-32 BRASS SCREWS SECURING SPINNING TO BRIDGE
3-5 INCH MIDDLE SECTION OF BRIDGE
4-LONG SLOTS FOR SLIDING NUTS AND LUG SCREWS ON BOX
5-8-32 SLIDING NUTS ADJUSTABLE TO ANY PORCELAIN RECEPTACLE
6-8-32 IRON STOVE BOLTS SECURING RECEPTACLE TO BRIDGE
7-NO 4000 BRYANT RECEPTACLE
8-APPLETON LOCK NUT
9-OFFSET FOR DEEP OR SHALLOW BOXES AND FOR LOCK NUT
10-HOLE IN BRIDGE FOR ½ INCH AND ⅜ INCH FIXTURE STUDS
11-FIXTURE STUD
